

Voyageurs National Park Vegetation Map Class for Tamarack Scrub Poor Fen

The map class "[Tamarack Scrub Poor Fen](#)" is composed of the following vegetation associations, each described separately:

- [Tamarack Scrub Poor Fen](#)
- [Bog Birch – Leatherleaf Poor Fen](#)

The height of the tamaracks does not generally exceed 2 meters. This association is very similar to the Northern Sedge Poor Fen Association, except for the percent cover of tamarack. In the Tamarack Scrub Poor Fen Association, the tamarack is >25% cover.
